

PRAYAG

— **STEEL. STRENGTH. PRAYAG** —

PIPE | PIPE FITTING | TUBES

QUALITY POLICY

QUALITY POLICY

We are committed to continuously upgrade our knowledge and skills to improve the efficiency of our organisation and strive for outstanding quality of our products.

We assure quality of our products by satisfying the customer's requirement and by perfecting our systems and procedures through involvement of our employees.

We promise to deliver : Quality service at the most reasonable price, at the right time, at the right place and with right documents.

DIRECTOR'S DESK

In 1994, my father, **Shri P. J. Patel**, began Prayag Steel & Engineering Company from a small office in Mumbai. With nothing but determination, integrity, and the courage to dream, he built relationships with some of India's most prestigious institutions—**BARC, ISRO, IGCAR, NFC, NPCIL**.

His vision and commitment laid the foundation of a company rooted in trust and strength.

As the second generation, I feel a deep sense of **pride and gratitude**. Pride in the path he created, and gratitude for the trust our clients continue to place in us. Carrying forward his legacy is both an honor and a responsibility—one that inspires me every single day.

From a modest trading firm, we have grown into a manufacturing group with facilities in **Umbergaon and Vasai**. This growth reflects more than capacity—it reflects a generational shift, a renewed vision, and our commitment to building for the future.

But our journey does not stop here. With strong foundations in pipes, tubes, and fittings, we are also preparing to **diversify into equipment manufacturing**—a step that will transform us from a trusted supplier into a complete solutions partner for industries that demand reliability at every level.

For us, **steel is not just business—it is our identity, our promise, and our strength**. Every product we create carries a piece of our family's story, our team's dedication, and our client's trust.

As we look ahead, I invite you to join us on this journey of growth and innovation. Together, we can build partnerships that are as strong and enduring as the steel we shape.

STEEL. STRENGTH. PRAYAG.

With gratitude and regards,

Jayesh Patel

Director

STEEL IS **STRONG**
BUT OUR COMMITMENT
IS **STRONGER**

PRAYAG
—STEEL. STRENGTH. PRAYAG—

About Us

Founded in **1994**, **Prayag Steel & Engineering Company** has grown from a trading firm in Mumbai into a trusted manufacturer and supplier of high-performance **pipes, tubes, and fittings** for critical industries across India and overseas. With over three decades of experience, we have built a reputation for **quality, reliability, and innovation**.

Our manufacturing excellence is driven by two dedicated facilities:

- **Proficient Tubes Pvt. Ltd. (est. 2019)** – specializing in seamless and welded **tubes & pipes**.
- **State-of-the-art Fittings Unit** – producing a complete range of butt-weld, forged, and customized fittings.

With continuous investments in **Advanced Machinery, Stringent Quality Systems, And Skilled Manpower**, Prayag is committed to delivering products that meet **international standards (ASTM, ASME, DIN, JIS, EN, ISO)** and exceed customer expectations.

Today, we proudly supply to industries such as **Nuclear, Petrochemical, Defence, Aerospace, Oil & Gas, Pharmaceuticals, Chemicals And Engineering**, serving prestigious clients like **BARC, ISRO, NPCIL, IGCAR, ZIRCONIUM COMPLEX, DRDO AND MANY MORE**

Our journey has always been guided by our belief:

“STEEL. STRENGTH. PRAYAG.” – a promise of strength, precision, and trust in every product we manufacture.

With a strong foundation and a vision for expansion, Prayag continues to **innovate, upgrade, and deliver world-class piping solutions**, making us a partner of choice for mission-critical projects worldwide.

***Where Steel
Meets
Integrity***

Forging trust, strength, and precision since 1994.

Our Vision

To be recognized as a **global leader in piping solutions**, delivering not just products but **trust, strength, and reliability** to industries where quality is non-negotiable. We aim to **build a legacy of excellence** by continuously expanding our capabilities and setting new benchmarks in the steel industry.

Our Mission

- To manufacture **world-class pipes, tubes, and fittings** with precision, consistency, and innovation.
- To **empower industries**—from nuclear and defence to petrochemicals and pharma—by supplying products that perform under the toughest conditions.
- To ensure **customer confidence** through transparency, timely delivery, and uncompromising quality.
- To create an environment where **people, technology, and integrity** come together to drive sustainable growth.

Our Core Values

- **Strength** – We stand firm in our promise: *STEEL. STRENGTH. PRAYAG*. Every product we make is built to perform with durability and reliability.
- **Integrity** – Honesty and fairness guide every relationship—with our customers, employees, and partners.
- **Innovation** – We invest in technology and ideas that keep us ahead, ensuring smarter, faster, and better solutions.
- **Excellence** – From raw material to finished product, we aim for perfection in every detail.
- **Responsibility** – We value sustainability, safety, and community, ensuring growth that benefits everyone.
- **Trust** – Our strongest alloy is the trust we build with every client and project we serve..

*Driven by **Vision.**
Defined by **Excellence***

OUR JOURNEY OF STRENGTH

*AT PRAYAG, **EVERY MILESTONE** IS NOT JUST A DATE ON A **CALENDAR**
IT IS A STEP FORWARD IN **STRENGTH, VISION, AND TRUST.***

1994 – The Beginning

A small trading office in Mumbai, a big dream, and a simple belief: quality is remembered long after price is forgotten. Prayag Steel & Engineering Company was born with a commitment to supply materials that clients could rely on with closed eyes.

2000 – From Trading to Manufacturing (Flanges)

Our first leap into manufacturing — a dedicated flange production unit. This was not just about machines, but about taking control of quality in our own hands. Every flange carried our signature of precision, giving clients the confidence that they weren't just buying steel — they were buying assurance.

2004 – Fittings Unit Established

As projects demanded complete piping solutions, we invested in a state-of-the-art fittings facility. From elbows to tees, reducers to caps, our fittings began powering chemical plants, refineries, and nuclear projects. This step made Prayag not just a supplier, but a partner in progress.

2008 – Forging In-House

To eliminate dependency and strengthen quality roots, we brought forging completely in-house. This milestone was about self-reliance — ensuring every raw shape that left our floor was forged with accuracy, uniformity, and metallurgical integrity. For clients, this meant traceability, reliability, and zero compromises.

2019 – Pipes & Tubes Manufacturing Begins

With the implementation of BIS regulations, India witnessed a much-needed check on non-standard Chinese imports. That very moment, Prayag seized the opportunity and entered pipe & tube manufacturing with Proficient Tubes Pvt. Ltd.

Equipped with pilger machines, draw benches, piercing machines, pickling & passivation and electric furnaces, this facility began producing high-precision seamless in stainless steel and exotic alloys like Monel, Inconel, and Hastelloy. This marked the beginning of Prayag's transformation into a complete piping solution provider.

The turning point came with the introduction of BIS regulations, which restricted non-standard Chinese pipes from entering India. The very day that opportunity opened, Prayag seized it — and without wasting a moment, we began building our PIPES & TUBES manufacturing unit at Umbergaon. This expansion is not just about space — it is about vision and preparedness.

This milestone reflects what Prayag has always stood for: not chasing growth, but building trust step by step, ton by ton, year by year.

2024 – Expansion with 98,000 sq. ft. Facility

To keep pace with the growing demand and strengthen our long-term vision, Prayag acquired an additional 98,000 sq. ft. of land at Umbergaon for a dedicated pipes manufacturing unit.

This upcoming facility will be a benchmark in pipe manufacturing — equipped with the latest technology, advanced testing labs, and enhanced capacity.

THE STEEL LEGACY OF **PRAYAG** (1994 - Present)

Three Decades of
Unbreakable Strength

1994 – The Foundation

Prayag Steel & Engineering Company begins its journey in Mumbai, with a vision to strengthen India's nuclear and space backbone.

1998 – Pokhran-II

When India tested its nuclear capabilities, Prayag's supplied steels were already empowering **BARC's nuclear support infrastructure**.

Behind the scenes, our steel became part of India's boldest moment.

2014 – NPCIL Nuclear Reactors

Supplied high-integrity pipes and fittings for India's civilian nuclear energy program under **NPCIL**, meeting the strictest safety codes.

2002 – Missile Encryption Systems

Partnership with **BARC & ECIL**: Supplied specialized steels and fittings for **antenna systems & encryption platforms** powering India's missile and radar systems.

2016 – Chandrayaan-2

In partnership with **MTAR Technologies**, Prayag's tubes and fittings contributed to India's second lunar mission.

2006 – KALI Project

Through **BARC & DRDO**, Prayag contributed to the **KALI (Kilo Ampere Linear Injector)** program, supplying steels capable of withstanding extreme energy applications.

2019 – Gaganyaan Preparations

Prayag alloys supplied for **cryogenic rocket engines, testing platforms, and space infrastructure**, supporting India's first manned mission initiative.

2008 – Chandrayaan-1

India's first mission to the Moon carried components made with Prayag's material for the **rocket top knock system**.

2023 – Chandrayaan-3 Success

As India landed on the Moon, Prayag's steel once again proved its place in **launch systems and ground support infrastructure**.

2012 – Advanced Alloys Era

Expanded production to exotic alloys — Monel, Inconel, Hastelloy, Titanium — strengthening supplies to nuclear, cryogenic, and space programs.

2024 – The Future: Fusion & Beyond

Partnering with **BARC, DRDO & ISRO**, Prayag is contributing to **fusion research, propulsion technologies, and next-gen nuclear innovation**.

✦ From Earth to the Moon, from reactors to rockets — Prayag has been the steel spine of India's boldest scientific dreams.

Leadership at **Prayag**

The Legacy of **Visionaries**

P. J. Patel – The Founder (1994–2013)

Experience:

A man of steel in every sense, Mr. P. J. Patel laid the very foundation of Prayag in 1994. With sheer grit and unmatched vision, he brought on board esteemed clients like BARC, ISRO, Nuclear Fuel Complex, IGCAR, and many more. His work was never about volume, but about impact. For nearly two decades, he dedicated Prayag solely to the nuclear, space, and defense segments—fields where precision, trust, and quality were non-negotiable.

Philosophy:

For him, steel was not just a material, it was a responsibility to the nation. His philosophy was simple yet powerful — serve India's most critical sectors with integrity and world-class quality.

Where He Is Now:

After an illustrious career, he is now completely retired, but his legacy continues to inspire every decision at Prayag.

Harish Patel – The Torchbearer (2013–2023)

Experience:

In 2013, Harish Patel, the elder son, carried forward the torch of his father's legacy. He not only consolidated Prayag's position in nuclear, space, and defense but also expanded into new industries like blades and oil & gas. His sharp vision and strong networking opened doors to international collaborations and overseas clients.

In 2019, when BIS regulations reshaped the Indian market and reduced Chinese dominance, he saw an opportunity others missed. He founded Proficient Tubes Pvt. Ltd., a Prayag subsidiary, venturing into pipes manufacturing—a bold move that further strengthened Prayag's steel empire.

A leadership that forges vision into reality

Philosophy:

A believer in resilience and expansion, he emphasized innovation, diversification, and long-term trust-building with clients across industries.

Where He Is Now:

Today, Harish Patel serves as the Director of Proficient Tubes Pvt. Ltd. and sits on the Board of Prayag, continuing to play a crucial role in guiding its growth.

Jayesh Patel – The Visionary of Today (2023–Present)

Experience:

The youngest of the leadership legacy, Jayesh Patel brings a fresh, ambitious, and modern outlook to Prayag. A marketing enthusiast at heart, he has been instrumental in taking Prayag beyond its traditional strongholds. Under his leadership, Prayag has begun expanding into new-age industries like FMCG, chemicals, and other emerging sectors—without ever losing touch with its roots in nuclear, space, and defense.

Philosophy:

For Jayesh, Prayag is more than a company—it is a story of innovation, adaptability, and relentless growth. His leadership style blends modern marketing with deep client empathy, ensuring that Prayag stays relevant, trusted, and future-ready.

His goal :

To make Prayag a global steel legacy, built on trust, technology, and transformation.

Guided by experience.

Driven by Innovation.

Three Decades of
Excellence
In Every **ALLOY**

We don't follow
INDUSTRY
STANDARDS.

We Set Them

PRAYAG
STEEL. STRENGTH. PRAYAG

A glowing, cylindrical metal component, likely a piston or valve, is shown in a dark environment, illuminated by a bright orange-red light, suggesting it is extremely hot or molten. The component has a flange at the base and a textured, mottled surface. The background is dark with some scattered sparks or particles.

FORGING TRUST, STRENGTH & PRECISION SINCE 1994

INTEGRITY

PRAYAG
STEEL. STRENGTH. PRAYAG

BORN IN **FIRE** BUILT TO LAST

Flanges Division

At **Prayag Steel & Engineering Company**, we take pride in being one of the leading manufacturers of high-quality stainless steel and nickel alloy flanges. With over **three decades of experience**, our flanges are engineered to meet the highest international standards, ensuring exceptional strength, dimensional accuracy, and leak-proof performance in critical service conditions.

Manufacturing Capabilities

- **Size Range:** ½" to 36"
- **Pressure Class:** 150# to 2500#
- **Manufacturing Type:** Forged, Machined, and CNC Finished
- **Material Grades:** Stainless Steel, Carbon Steel, Alloy Steel, Duplex, Super Duplex, Inconel, Monel, Hastelloy, Titanium
- **Standards:** ASTM / ASME / DIN / EN / BS / MSS-SP / ISO

Types of Flanges Manufactured

- Weld Neck Raised Face (**WNRF**)
- Weld Neck Flat Face (**WNFF**)
- Weld Neck Serrated Face (**WNSF**)
- Weld Neck Small Tongue (**WNST**)
- Weld Neck Small Groove (**WNSG**)
- Blind Raised Face (**BLRF**)
- Blind Serrated Face (**BLSG**)
- Blind Large Tongue (**BLLT**)
- Blind Large Groove (**BLLG**)
- Weld Neck Large Tongue (**WNLG**)
- Weld Neck Large Groove (**WNLG**)
- Slip-On, Socket Weld, Lap Joint, Threaded & Orifice Flanges

Manufacturing Capabilities

- **Size Range:** ½" to 36"
- **Pressure Class:** 150# to 2500#
- **Manufacturing Type:** Forged, Machined, and CNC Finished
- **Material Grades:** Stainless Steel, Carbon Steel, Alloy Steel, Duplex, Super Duplex, Inconel, Monel, Hastelloy, Titanium
- **Standards:** ASTM / ASME / DIN / EN / BS / MSS-SP / ISO

Types of Flanges Manufactured

- Weld Neck Raised Face (**WNRF**)
- Weld Neck Flat Face (**WNFF**)
- Weld Neck Serrated Face (**WNSF**)
- Weld Neck Small Tongue (**WNST**)
- Weld Neck Small Groove (**WNSG**)
- Blind Raised Face (**BLRF**)
- Blind Serrated Face (**BLSG**)
- Blind Large Tongue (**BLLT**)
- Blind Large Groove (**BLLG**)
- Weld Neck Large Tongue (**WNLG**)
- Weld Neck Large Groove (**WNLG**)
- Slip-On, Socket Weld, Lap Joint, Threaded & Orifice Flanges

Production Process

Our flange manufacturing facility is equipped with **modern CNC, VMC, and turning centers** to ensure precise machining and perfect surface finishing. Every flange is **forged and heat-treated** to achieve the desired mechanical strength and metallurgical properties.

Key Machinery Includes:

- JV55 VMC
- LX20 L3 (2 Units)
- SINEWY 3050 CNC
- Band Saw Machines
- Hydraulic Presses
- Oil & Electric Fired Furnaces
- EOT Cranes & Handling Equipment

Testing & Quality Control

All flanges undergo **comprehensive inspection and testing procedures** to ensure conformance with dimensional and metallurgical requirements. Testing is performed in accordance with **ASTM, ASME, and PED** standards.

Our Commitment

Every flange manufactured by **Prayag Steel & Engineering Company** is a blend of **engineering precision and metallurgical excellence**. We aim to deliver products that **stand the test of time**, ensuring **leak-proof connections, dimensional integrity, and reliable performance** in the most demanding environments.

SEAMLESS CONNECTIONS. INFINITE STRENGTH.

Fittings Division

At **Prayag Steel & Engineering Company**, we manufacture a comprehensive range of **Butt-Weld and Forged Fittings** designed to deliver superior performance in critical process applications. Backed by **three decades of metallurgical expertise** and advanced forming technology, our fittings are known for **dimensional accuracy, corrosion resistance, and long service life** — ensuring leak-proof, high-integrity connections across diverse industries.

Manufacturing Capabilities

- **Size Range:** ½" to 16"
- **Type:** Seamless & Welded Butt-Weld / Forged
- **Material Grades:** Stainless Steel, Alloy Steel, Duplex, Super Duplex, Inconel, Monel, Hastelloy, Titanium, Brass, Cupro Nickel, Incoloy
- **Pressure Ratings:** 3000#, 6000#, 9000#
- **Standards:** ASTM / ASME / MSS-SP / DIN / EN / BS / ISO

Products Manufactured

Butt-Weld Fittings:

- Elbows (45°, 90°, 180° — SR & LR)
- Tees (Equal & Reducing)
- Reducers (Concentric & Eccentric)
- Caps, Stub Ends, Crosses

Forged Fittings:

- Socket Weld & Threaded Elbows, Tees, Couplings, Unions, Plugs, Bushings, Nipples

Each fitting is **formed, machined, and heat-treated** to meet the highest mechanical and metallurgical standards.

Key Machinery Includes:

- Hot Elbow Forming Machine · Cold Elbow Forming Machine
- Cold Forming Hydraulic Press (for Tee, Reducer & Cap)
- Hydraulic Presses · Band Saw Machines
- Electric & Oil-Fired Furnaces · EOT Cranes & Chain Pulley Blocks
- Radial Drill Machines · Lathe Machines

Testing & Quality Control

Every fitting undergoes multi-stage inspection

to ensure conformance with international codes and client specifications.

Testing is carried out by qualified QA/QC personnel as per ISO 9001:2015 and PED requirements.

Tests Conducted:

- Visual & Dimensional Inspection
- Hydrostatic & Pneumatic Testing
- Dye Penetrant & Magnetic Particle Examination
- Mechanical Testing (Tensile, Hardness, Flattening)
- Micro & Macro Examination
- Intergranular Corrosion (IGC) Test
- PMI (Positive Material Identification)

Our Commitment

At **Prayag Steel & Engineering Company**, we believe **quality is engineered** — not inspected.

Every fitting that leaves our facility is a reflection of our promise:

Precision. Strength. Reliability.

*Because when it comes to performance, **Prayag** delivers beyond expectations.*

Because perfection lies where joints don't exist.

STRENGTH THAT FLOWS THROUGH EVERY LINE

Technical Overview

We manufacture Seamless Pipes in Stainless Steel, Nickel Alloys, and Special Metals designed for high-pressure, high-temperature, and corrosive environments. Each pipe undergoes stringent dimensional and metallurgical checks to ensure leak-proof integrity, uniform wall thickness, and high mechanical strength.

Manufacturing Range
Type Outside Diameter Wall Thickness Length
Seamless Pipes 6 mm to 168 mm (¼" to 6") 0.5 mm to 10 mm Up to 6 meters

Welded Pipes ½" NB to 24" NBs per ASTM A312 / A358 Up to 12 meters

Manufacturing Process

- Raw Material: Billets
- Process Route (Seamless): Piercing Rolling
Pilgering Solution Annealing Pickling
Straightening Polishing Inspection Packing

Grades Manufactured

- Austenitic Stainless Steel: SS304 / 304L / 316 / 316L / 321 / 347
- Nickel Alloys: Monel 400, Inconel 600 / 625, Hastelloy C22 / C276, Incoloy 800 / 825
- Duplex & Super Duplex: UNS S31803 / S32750
- Others: Titanium, Cupro Nickel, Brass

Technical Standards

- ASTM: A312 / A213 / A269 / A511 / A790
- ASME: SA312 / SA213 / SA269 / SA511 / SA790
- DIN / EN: EN 10216 / EN 10217
- NACE: MR0175 / MR0103 compliance available

Testing & Inspection

- Hydrostatic Test (100% pipes)
- Eddy Current Test
- Ultrasonic / Pneumatic Leak Test
- PMI (Positive Material Identification)
- Intergranular Corrosion Test (IGC)
- Dimensional & Visual Inspection as per MSS SP-55

Surface Finish

- Bright Annealed (BA)
- Pickled & Passivated
- Polished (Ra Value Upto 0.2)
- Mirror Finish (for instrumentation use)

Applications

- Chemical & Petrochemical Plants
- Nuclear & Defence Installations
- Heat Exchangers & Condensers
- Fertilizer & Refineries
- Power Generation & Process Industries

Seamless performance for every critical application.

PRECISION IN EVERY INCH

Technical Overview

Tubes Division

At **Proficient Tubes Pvt. Ltd.**, a manufacturing unit of **Prayag Steel & Engineering Company**, we specialize in producing **high-performance seamless and welded tubes** designed to meet the most demanding industrial applications.

Our manufacturing processes are engineered for **precision, consistency, and reliability**, ensuring that every tube we deliver performs flawlessly under critical conditions.

Manufacturing Capabilities

- **Size Range:** 6 mm OD to 219 mm OD
- **Wall Thickness:** 0.5 mm to 12 mm
- **Length:** Up to 12 meters
- **Manufacturing Type:** Seamless & Welded
- **Grades:** Stainless Steel, Inconel, Monel, Hastelloy, Titanium, Cupro Nickel, and other Nickel Alloys
- **Standards:** ASTM / ASME / DIN / EN / NACE / ISO

Production Process

Our tube manufacturing line is equipped with world-class machinery and process control systems for achieving dimensional accuracy and superior surface finish.

Key Machinery Includes:

- Pilger Mill
- Draw Bench
- Piercing Machine
- Rolling Mill
- Pickling & Passivation Line
- Electric Furnace
- Straightening Machine
- Polishing Machine

Each tube undergoes stringent heat treatment, surface finishing, and inspection protocols to ensure **uniform microstructure, enhanced**

Testing & Quality Control

Quality is integrated at every stage of production. Our in-house testing facilities comply with international standards and customer-specific requirements.

Tests Conducted:

- Hydrostatic & Pneumatic Testing
- Eddy Current Testing
- Ultrasonic Examination
- Visual & Dimensional Inspection
- Mechanical Testing (Tensile, Hardness, Flattening, Flaring)
- Intergranular Corrosion (IGC) Test
- Micro & Macro Examination

All testing is carried out under the supervision of qualified QA personnel as per **ISO 9001:2015** and **PED** requirements.

Applications

Our tubes are widely used across:

- Nuclear & Defence
- Petrochemical & Refinery
- Heat Exchangers & Condensers
- Instrumentation & Control Systems
- Power Generation

Engineered to withstand, designed to deliver.
